

World Congress for Wetland and Lake Restoration

Living Lakes – Business and NGO Partnerships for Climate Change Mitigation and Adaptation

15th International Living Lakes Conference 2019

7th – 9th May 2019

Complex Esportiu-Cultural Petxina, Valencia, Spain

20 Years of Living Lakes - A look into the future

CONFERENCE SPONSORS:

15th International Living Lakes Conference 2019 | 7 - 9 May 2019 | Valencia, Spain

World Congress on Wetland and Lake Restoration

Living Lakes – Business and NGO Partnerships for Climate Change Mitigation and Adaptation

Location: Valencia, Spain

Hosts: Fundación Global Nature Spain and Global Nature Fund International

Supporters: Ministries and Municipalities of Spain and Germany, Private Sector Supporters and Fundación Biodiversidad www.fundacion-biodiversidad.es

EU Eklipse Programme: www.eklipse-mechanism.eu

Date: 7th – 9th May 2019

Topic: Living Lakes – Business and NGO Partnerships for Climate Change Mitigation and Adaptation

20 Years of Living Lakes

Since its foundation in November 1998, the Living Lakes Network unites environmental organisations striving for the protection of lakes and wetlands worldwide. Starting with four partners, the network today consists of 109 partner lakes represented by member organisations from all over the world. It created a platform for raising awareness, exchanging ideas and advice and initiating common projects. The Living Lakes Network has tackled many challenges, grown together and developed a mutual trust over the years. The 20th anniversary of the network is a reason to celebrate the success story of Living Lakes, to pass in review and forging out plans for the future.

Venue

Complex Esportiu-Cultural Petxina, Valencia, Spain

Passeig de la Petxina, 42, 46008 València

Involving the Private Sector

Since its creation in 1998, Global Nature Fund and Living Lakes have been seeking for strong alliances with partners from the private sector. GNF and its partners – within others Fundación Global Nature – pursue careful and considerate use of natural resources as well as the development of alternative income sources. In our global world, the strong interconnection between environmental and economic development becomes more and more evident. Strong and positive social and environmental performances of companies are a necessity if we want to solve the big challenges our planet is facing. Strengthening biodiversity and ecosystems can therefore be an opportunity for business knowing that almost every business sector depends to some extent on biodiversity and ecosystem services.

15th International Living Lakes Conference 2019 | 7 - 9 May 2019 | Valencia, Spain

World Congress on Wetland and Lake Restoration

Living Lakes – Business and NGO Partnerships for Climate Change Mitigation and Adaptation

Background Information

The importance of lakes

Lakes and wetlands are among the world's most easily accessible source for fresh water. They are dynamic aquatic ecosystems; simultaneously providing fresh water, food, micro climate and recreation for humans, in addition to sustaining habitats for thousands of species of animals and plants. Water is a precious shared resource and its protection requires citizens, corporations and nations to act responsibly. The Living Lakes Network is about developing partnerships with all stakeholders to ensure a balance is firmly established between protecting sensitive ecosystems and managing the growth of lake-sensitive economic development – whether it is recreational, agricultural or industrial.

Current challenges in the management of water ecosystems

- » Insufficient regulation of water withdrawal
- » Contamination from point and non-point sources
- » Pressure of exploitation on surrounding areas
- » Lack of implementation of legislation for the protection of aquatic ecosystems
- » Lack of resources for the management & protection
- » Problems in administration and unclear assignment of responsibilities
- » Lack of public perception & knowledge about ecological values of water ecosystem such as lakes and wetlands

Target Group

Sound water management is crucial to find the right balance between optimising the use of water resources and protecting of the ecological integrity of lake and wetland ecosystems. This is of special importance because of the challenging impacts of climate change. There is a wide consensus on how best management practices are reached, and that is by including all stakeholders acting in the lakes basin. Therefore this conference targets the wide range of stakeholder implicating in lakes and wetland management, including: companies of those economic sectors benefitting directly from lakes ecosystem services (e.g. tourism, food), farmers and fishermen, administrations and political decision makers on local and regional level, scientific institutions, NGOs and other representatives of the local communities.

Fundación Global Nature

Since the creation of this private, non-profit foundation in 1993, Fundación Global Nature (FGN) brings together theory and practice and combines the elaboration of strategies and plans with field work and applied projects. The main working areas are restoration of wetlands and protection of other valuable habitats, sustainable agriculture and business and biodiversity. Apart from implementing projects at a national and European level, FGN develops initiatives in other continents to support the achievement of the UN Sustainable Development Goals.

15th International Living Lakes Conference 2019 | 7 - 9 May 2019 | Valencia, Spain

World Congress on Wetland and Lake Restoration

Living Lakes – Business and NGO Partnerships for Climate Change Mitigation and Adaptation

Global Nature Fund

Headquartered in Germany at Lake Constance, Global Nature Fund (GNF) is a non-profit, private, independent international foundation for the protection of the environment and nature. GNF launched the global Living Lakes network in 1998, the only lake network of NGOs worldwide.

Living Lakes

Living Lakes is an international network and partnership with the mission to enhance the protection, restoration and rehabilitation of lakes, wetlands and other freshwater bodies of the world.

Media Participation

Media representatives from around the world will be involved in the conference and observe the steps to preserve our water legacy for future generations. Conference delegates will exchange on what is being done, on municipal, provincial and federal level, to handle water as a scarce resource being the prerequisite for business development.

Organisational Information

Registration Procedure

- » For registration please fill in the online registration form at <https://fundacionglobalnature.org/15llc-inscripcion/>. You will receive a registration confirmation which will include a request for payment. Your registration is valid after payment of the full conference fee. Please note that the number of participants for the event is limited.
- » Registration for the Optional Tour Activities on 10th and 11th May can be made at the registration desk at the conference.

Conference Supporters

The conference is kindly supported by i.a. Fundación Biodiversidad, Aguas de Valencia Foundation, City of Valencia, EU EKLIPSE Programme, Parador de Turismo de El Saler.

Participation Fee

- » **50 Euro for the full conference**
- » Please note that transportation for the field trip (Wednesday 8th May 2018) and meals as listed in the programme can only be covered for the first 120 registrations.

Cancellation Policy /Refunds

Payment in full must accompany registration. Cancellations are required in writing and must be received on or before 31st March 2019 for a full refund. Cancellations received on or after 1st April 2019 are non-refundable. Refunds will be paid after the convention.
